# Faculty/Staff

Principal's messages for the yearbook are written in the early months of the school year. This makes the task doubly difficult as, being new, I hardly know the school & have only started to get to know the students.

My first impressions of the students and the school are extremely positive & I am sure that in the next few years that we will enjoy working together to make Wagar an even more successful school. As you the members of the graduating class prepare to move on to the next stage of your lives I hope that you do so with the knowledge that education is a life long project. Whether you are in class in a formal educational setting or simply taking a walk on a weekend there is always much to be learned. Take the time to observe & listen, benefit from the experiences of others and share yours. It is your role as the leaders of the future to ensure that we do not merely repeat history but that we strive to achieve a world without war or poverty. We can grow so that we do not judge each other by the colour of our skin or by our religion or sex. You must believe in yourselves and that you can have influence globally by acting locally.

I wish you good luck & sincerely hope that you will return to see us to report on your conquests & to follow our progress as a school in our quest to continue to adapt to the needs of our 'community'.

To those of you who are returning to school have a safe and happy summer, Wagar awaits your pleasure at the end of August, I hope you will return refreshed and ready for another great year.

Richard Meades  
Principal

Graduating Students,

It is to you, the graduating students of Wagar High School Class of 1997, that congratulations are due.

I encourage you all to nurture and develop your potential to the fullest. Doing so will ultimately enrich the quality of your lives and provide you with the opportunity to work and help others.

Your problems may never be easy to solve due to the rapidly changing world in which we live. It will however, be your challenge to build a better society and I hope you will then be able to make your personal contribution and commitment to our world.

It is very important that you all develop good judgment, that you do not just follow what might be popular. Rather, make your decisions based on the facts and with a spirit of cooperation for those with whom you are dealing. Remember that knowledge is important, but its essence is in its application - use it judiciously not unwisely.

Do not wait on your luck. You must strive to create your own opportunities by reaching out, working hard and keeping to your ideals.

R Jones  
Vice Principal  
Wagar High School  
October/1997
